

BETTER BATHROOMS & KITCHENS

AESTHETIC BRILLIANCE IN SIMPLICITY

CLEAN LINES, STANDOUT DESIGN

Better Bathrooms & Kitchens have a flair for creative agility, using quality fittings and materials which have been brilliantly showcased in the featured bathroom. Their track record of creating outstanding custom built bathrooms in an endless range of styles is assuring when considering your own needs.

Building up to 50 renovations in metropolitan Melbourne annually, Better Bathrooms not only transform bathrooms, they also specialise in designing kitchens, laundries and all internal works, including the removal and adding of walls, floors, ceilings, doors and windows.

The owners of the featured space wanted a bathroom to be created which included a bath, clean lines, privacy and an aesthetically appealing atmosphere. Some of the standout features that were implemented to help achieve this look included the frequent use of circular shapes, which soften the modern surrounding of black and white tones.

The curved, oval shaped bath stands out yet is seamlessly aligned in unison with the Catalano white oval basin. This theme is maintained throughout and this blended pattern is heightened by the use of a stunning, round mirror situated over the basin.

The wall-hung vanity divides the wall for the shower and toilet areas, elegantly styled to create the privacy needed in a bathroom. The space can hence accommodate more than one person at any time thanks to the separate, strategically designed areas, making it highly functional.

The bathroom is decked out with all the comforts modern day living has to offer, including under floor heating, which eliminates the temperature shock when stepping out of the shower. The comfort is extended to even the smallest details, including finger groove handles.

The owner's request for clean lines is accomplished skilfully and artistically. Sharply contrasting with the rounded shapes is the square, high gloss, vinyl wrap vanity and cabinets. The use of white intensifies the clean look created.

The clean lines are extended in the deliberately present, modern chrome tap ware. The tap for the bath and basin are square rods protruding from the walls, mimicking the consistent chrome lines of the wall mounted towel rack.

The use of marble benchtops and tiles allows for easy cleaning and guaranteed durability so worrying about the deterioration of the bathroom will be a thing of the past. In a space where water is ever-present, high quality lasting materials are a must.

The lighting was intended to be a spectacle when this space was designed – and it certainly is. Downlights are installed throughout and above the shower, as well as night lights decked under the vanity.

As one of the most used rooms of the house, such attention to detail, as displayed in this featured bathroom, is more of a necessity than an added benefit – resulting in an efficient space that you spend less time in and fussing over.

With more than 22 years of kitchen and bathroom renovation experience, Better Bathrooms & Kitchens have created a highly credible name for themselves, which can be seen in each of their unique creations.
